Cloud infrastructure specialization

About the course

Cloud Computing with AI is a career-focused programme at **Akbar's Academy I.T. Institute** that helps you understand cloud infrastructure, deploy applications and manage cloud-based resources.

You'll learn **IaaS, PaaS and SaaS, cloud models, AWS, Microsoft Azure or Google Cloud, virtual machines, storage, networking, identity, security, deployment, monitoring and cost management**, with **AI-assisted** monitoring and troubleshooting. You'll finish by deploying and monitoring a basic application in a cloud environment.

Career-focused IT education
Skills aimed at real job roles

Practical learning
Hands-on work and a portfolio project

AI-powered skills
AI-assisted monitoring, troubleshooting and documentation

COURSE OBJECTIVE

Understand cloud infrastructure, deploy applications and manage cloud-based resources with AI-assisted monitoring and troubleshooting.

Course at a Glance

COURSE FEE

₹55,000

Cloud Computing with AI

TRACK

Cloud infrastructure specialization

A focused path into cloud platforms and operations.

SYLLABUS

12 learning modules

Including a hands-on practical project.

MAIN FOCUS

Cloud infrastructure & deployment

Run applications and resources in the cloud.

IDEAL FOR

Students interested in IT infrastructure

Anyone curious about how the cloud runs.

OUTCOME

A deployed cloud application

A basic app you deploy and monitor in the cloud.

DURATION & BATCHES

Ask the academy

Contact the academy for current batch duration and timings.

What the fee covers

- Cloud platforms
- Virtual machines
- Networking
- Deployment
- Monitoring
- Cloud security

Learning Approach

How the course takes you from first concepts to a job-ready portfolio.

Step 1 · Theory
01

Core concepts and industry fundamentals of cloud computing.

Step 2 · Practical Sessions
02

Guided exercises and demonstrations on cloud platforms.

Step 3 · AI Integration
03

AI-assisted cloud operations and documentation, used responsibly.

Step 4 · Projects
04

At least one portfolio-ready project: a deployed, monitored cloud app.

Step 5 · Career Preparation
05

CV guidance, interview practice and project presentation.

Your course roadmap

Fundamentals › IaaS · PaaS · SaaS › Cloud Models › Platforms › VMs & Storage › Networking & IAM › Security › Deployment › Monitoring › AI Ops › Cost › **Capstone Project**

Detailed Curriculum

What you will learn

Modules 01 – 06 of 12

01

FOUNDATIONS

Cloud computing fundamentals

What the cloud is, how it works and why businesses rely on it.

02

SERVICE MODELS

IaaS, PaaS and SaaS

Understand the three main cloud service models and when each is used.

03

CLOUD MODELS

Public, private and hybrid cloud concepts

Compare public, private and hybrid clouds and how organisations combine them.

04

PLATFORMS

Introduction to AWS, Microsoft Azure or Google Cloud

Get started with a leading cloud platform: AWS, Microsoft Azure or Google Cloud.

05

COMPUTE

Virtual machines and cloud storage

Create virtual machines and store data using cloud storage services.

06

NETWORKING

Networking and identity management fundamentals

Connect cloud resources and control who can access them.

Detailed Curriculum

What you will learn

Modules 07 – 12 of 12

07

SECURITY

Cloud security and access permissions

Protect cloud resources with the right security settings and permissions.

08

DEPLOYMENT

Application deployment basics

Deploy applications to the cloud so users can reach them.

09

OPERATIONS

Monitoring, logging and troubleshooting

Watch cloud systems, read logs and fix problems when they appear.

10

AI SKILLS

AI-assisted cloud operations and documentation

Use AI tools to support cloud operations and write clear documentation.

11

COST

Cost management and resource optimization

Keep cloud spending under control and use resources efficiently.

12

CAPSTONE

Practical project

Deploy and monitor a basic application in a cloud environment.

Tools & Platforms

Platforms and tool types covered across the syllabus.

AWS / Azure / Google Cloud
Cloud platforms

Virtual Machines
Compute

Cloud Storage
Data storage

Cloud Networking
Connectivity

Identity & Access
Permissions

Deployment
App hosting

Monitoring & Logs
Operations

AI Ops Assistants
Troubleshooting & docs

Cost Management
Optimization

PRACTICAL PROJECT

Deploy and monitor a basic application in a cloud environment

Bring every module together in one portfolio-ready project, from setting up resources to keeping your app running.

Set up › Configure security › Deploy app › Monitor › Optimize cost

Career Opportunities

Roles this course prepares you to pursue.

Cloud Support Associate
Support cloud users and systems

Cloud Operations Trainee
Help run cloud operations

Junior Cloud Engineer
Build and manage cloud resources

Technical Support Associate
Solve technical issues

Cloud Administrator Trainee
Administer cloud environments

MAIN FOCUS
Cloud infrastructure and deployment

IDEAL FOR
Students interested in IT infrastructure

Why choose this course

- Cloud fundamentals: IaaS, PaaS, SaaS and cloud models
- Hands-on with AWS, Microsoft Azure or Google Cloud
- Virtual machines, storage, networking and identity
- Cloud security and access permissions
- Monitoring, troubleshooting and AI-assisted cloud operations
- Cost management, ending with a deployed cloud project

Fees & Enrollment
