About the course

Desktop Support with AI is a career-focused programme at **Akbar's Academy I.T. Institute** that prepares you to install, maintain and troubleshoot computers, software, networks and workplace IT systems.

You'll learn **hardware, PC assembly, Windows, drivers and software, user accounts, networking, printers and peripherals, remote support, and backup and recovery**, with **AI-assisted troubleshooting** and documentation. You'll finish by diagnosing and resolving common desktop support issues.

Career-focused IT education
Skills aimed at real job roles

Practical learning
Hands-on work and a portfolio project

AI-powered skills
AI-assisted troubleshooting and documentation

COURSE OBJECTIVE

Prepare students to install, maintain and troubleshoot computers, software, networks and workplace IT systems using AI-assisted support tools.

Course at a Glance

COURSE FEE

₹35,000

Desktop Support with AI

TRACK

IT infrastructure foundation

A practical starting point for a career in IT support.

SYLLABUS

12 learning modules

Including a hands-on practical project.

MAIN FOCUS

Computer troubleshooting

Keep computers, users and offices running.

IDEAL FOR

Beginners entering IT support

No prior IT experience needed to get started.

OUTCOME

Hands-on support experience

Real practice diagnosing and fixing common issues.

DURATION & BATCHES

Contact the academy for current batch duration and timings.

What the fee covers

- Hardware
- Windows
- Troubleshooting
- Networking
- Remote support
- AI-assisted diagnostics

Learning Approach

How the course takes you from first concepts to a job-ready portfolio.

Step 1 · Theory
01

Core concepts and industry fundamentals of desktop and IT support.

Step 2 · Practical Sessions
02

Guided hands-on exercises on hardware, software and networks.

Step 3 · AI Integration
03

AI-assisted troubleshooting and technical documentation, used responsibly.

Step 4 · Projects
04

At least one portfolio-ready project: diagnosing and resolving real issues.

Step 5 · Career Preparation
05

CV guidance, interview practice and project presentation.

Your course roadmap

Hardware › PC Assembly › Windows › Drivers & Software › Accounts › Networking › Peripherals › Remote Support › Backup › AI Troubleshooting › Help Desks › **Capstone Project**

Detailed Curriculum

What you will learn

Modules 01 – 06 of 12

01

HARDWARE

Computer hardware and components

Learn what's inside a computer: processors, memory, storage, motherboards and power supplies.

02

HARDWARE

PC assembly and troubleshooting

Build a PC from its parts, and find and fix common hardware problems.

03

WINDOWS

Windows installation and configuration

Install Windows and set it up correctly for home and workplace use.

04

SOFTWARE

Drivers, software installation and updates

Install and update drivers and software, and keep systems current.

05

WINDOWS

User accounts, permissions and system settings

Manage users, control who can access what, and configure system settings.

06

NETWORKING

Basic networking, IP addresses and DNS

Understand how computers connect, and work with IP addresses and DNS.

Detailed Curriculum

What you will learn

Modules 07 – 12 of 12

07

PERIPHERALS

Printers, peripherals and connectivity troubleshooting

Set up and fix printers, devices and connection problems.

08

SUPPORT

Remote desktop support and ticketing fundamentals

Help users remotely and manage support requests with ticketing systems.

09

DATA

Backup, recovery and basic data protection

Back up important data, recover it when things go wrong and keep it protected.

10

AI SKILLS

AI-assisted troubleshooting and technical documentation

Use AI tools to diagnose problems faster and write clear technical documentation.

11

IT SERVICE

Introduction to IT service management and help desks

Learn how professional IT support teams and help desks are organised and run.

12

CAPSTONE

Practical project

Diagnose and resolve common desktop support issues.

Tools & Platforms

Systems and tool types covered across the syllabus.
