About the course

Full Stack Development with AI is a career-focused programme at **Akbar's Academy I.T. Institute** that teaches you to build modern websites and web applications, from the screen users see all the way to the server behind it.

You'll work across the whole stack: **frontend, backend, databases, APIs and deployment**, using **AI-assisted coding** to write, debug and understand code faster. You'll finish by building and deploying a complete full-stack web application.

Career-focused IT education
Skills aimed at real job roles

Practical learning
Hands-on work and a portfolio project

AI-powered skills
AI-assisted coding, debugging and code explanation

COURSE OBJECTIVE

Develop modern websites and web applications from the user interface to the backend, database and deployment, with AI-assisted development.

Course at a Glance

COURSE FEE

₹60,000

Full Stack Development with AI

TRACK

Advanced development track

A complete path from the user interface to deployment.

SYLLABUS

12 learning modules

Including a hands-on practical project.

MAIN FOCUS

Website & application development

Build what users see and the systems behind it.

IDEAL FOR

Students interested in coding

Anyone who enjoys building things with code.

OUTCOME

A deployed full-stack application

A live project you can show to employers and clients.

DURATION & BATCHES

Ask the academy

Contact the academy for current batch duration and timings.

What the fee covers

- Frontend
- Backend
- Databases
- APIs
- AI-assisted coding
- Full-stack projects

Learning Approach

How the course takes you from first concepts to a job-ready portfolio.

Step 1 · Theory
01

Core concepts and industry fundamentals of web development.

Step 2 · Practical Sessions
02

Guided coding exercises and tool demonstrations.

Step 3 · AI Integration
03

AI-assisted coding, debugging and code explanation, used responsibly.

Step 4 · Projects
04

At least one portfolio-ready project: a deployed full-stack web app.

Step 5 · Career Preparation
05

CV guidance, interview practice and project presentation.

Your course roadmap

HTML & CSS › JavaScript › Responsive Design › React.js › Node & Express ›
Databases › APIs › Git & GitHub › AI Coding › Security › Deployment ›
Capstone Project

Detailed Curriculum

What you will learn

Modules 01 – 06 of 12

01

FRONTEND

HTML5 and CSS3

Structure web pages with HTML5 and style them with CSS3: the building blocks of every website.

02

{ } FRONTEND

JavaScript programming

Add logic and interactivity to web pages with the language that runs the modern web.

03

FRONTEND

Responsive website design

Build layouts that look and work well on phones, tablets and desktops.

04

FRONTEND

React.js for frontend development

Create fast, component-based user interfaces with React.js.

05

BACKEND

Backend development using Node.js and Express.js

Build server-side logic and web services with Node.js and the Express.js framework.

06

DATABASE

Database fundamentals using MongoDB or SQL

Store, query and manage application data using MongoDB or SQL databases.

Detailed Curriculum

What you will learn

Modules 07 – 12 of 12

07

INTEGRATION

APIs and application integration

Connect the frontend, backend and third-party services through APIs.

08

WORKFLOW

Git and GitHub

Track code changes, collaborate with others and manage projects using Git and GitHub.

09

AI SKILLS

AI-assisted coding, debugging and code explanation

Use AI tools to write code faster, find and fix bugs, and understand unfamiliar code.

10

SECURITY

Website security fundamentals

Understand the basics of keeping websites, users and data safe.

11

DEPLOYMENT

Website hosting and deployment

Put your websites and applications live on the internet for real users.

12

CAPSTONE

Practical project

Build and deploy a complete full-stack web application.

Tools & Platforms

Technologies and tool types covered across the syllabus.

HTML5 & CSS3
Page structure & style

JavaScript
Programming

React.js
Frontend library

Node.js & Express.js
Backend

MongoDB / SQL
Databases

APIs
Integration

Git & GitHub
Version control

AI Coding Assistants
Code, debug & explain

Hosting
Deployment

PRACTICAL PROJECT

Build and deploy a complete full-stack web application

Bring every module together in one portfolio-ready project, from the user interface to the live, deployed application.

UI design › React frontend › Node & Express API › Database › Deploy live

Career Opportunities

Roles this course prepares you to pursue.

Frontend Developer
Build user interfaces

Backend Developer
Build servers, APIs & data

Full Stack Developer
Work across the whole stack

Web Developer
Create and maintain websites

Freelance Website Developer
Build sites for clients

MAIN FOCUS
Website and application development

IDEAL FOR
Students interested in coding

Why choose this course

- Covers the complete stack: frontend, backend, database and deployment
- AI-assisted coding, debugging and code explanation
- Modern tools: React.js, Node.js, Express.js, MongoDB or SQL
- Git and GitHub for real-world collaboration
- Website security and hosting fundamentals
- Ends with a deployed, portfolio-ready full-stack project

Fees & Enrollment

Full Stack Development with AI

Advanced development track

COURSE FEE

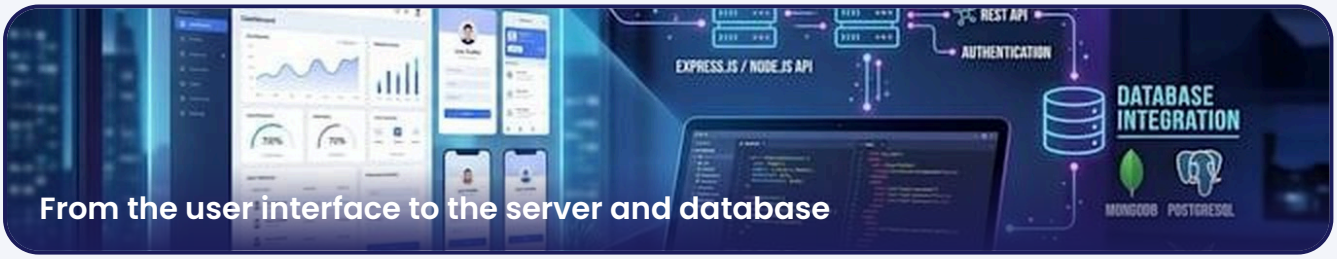

₹60,000

- Frontend development
- Backend development
- Databases
- APIs
- AI-assisted coding
- Full-stack projects
